

Come and see us at Domotex!

DOMOTEX, HANNOVER, 17-20 JANUARY 2015 - Hall 06 - STAND No. H16

For the fifth year running InstaFloor will be exhibiting its high performance, environmentally responsible flooring systems at Domotex. This year its InstaLay, InstaCradle and InstaSport ranges will be displayed and demonstrated on a larger, impressive, purpose built stand.

InstaLay, our revolutionary flooring installation system that incorporates a specially developed self-adhesive membrane, has been selected for the prestigious **Innovations @ Domotex** awards, which will be presented during the event.

At Domotex, InstaLay is delighted to be introducing the **new InstaLay 25hg (2.5mm high grab)** which has been developed specifically for use with LVTs. This, together with InstaLay 30 and 50 for carpet tiles and wood flooring, will be the subject of frequent demonstrations throughout the show.

With no messy wet adhesives or open time delays, flooring installations using InstaLay are quick, clean and easy and save significant time and money. Made from recycled rubber crumb, eco-friendly InstaLay is loose laid, greatly reduces sub-floor preparation times, and provides superior comfort and long lasting acoustic performance when used with LVTs, carpet tiles, wood, laminates, bamboo and carpets.

InstaCradle acoustic/sprung undercarriage floors and sports floors use a unique rubber crumb cradle that is guaranteed for 60 years. These adjustable raised floor systems, with a service void, include on-site levelling and remove the need for wet screeds.

We look forward to welcoming you to our stand and if you'd like to arrange a meeting with us during the exhibition please contact Paul Robson prior to the show at paul.robson@instafloor.co.uk and we will send you complimentary Domotex tickets. Alternatively, just drop by for a coffee or a drink and see our frequent InstaLay demonstrations – we're sure you'll be impressed! We look forward to welcoming you to our stand at Domotex
