- change in color as a result of the natural character of the floor by UV-light.
- pressure from the subfloor.
- Damage or discoloring caused by use of chemicals not being approved in our chemical resistance list.
- any damage caused by not using CLL primer and Protecshield together.

Skirting

The precast optional skirting for CLL is a prefabricated 70mm skirting which is glued to the wall prior to installing the floor. The color of the skirting is matched by computer the color of the floor. However it will be possible to see a slight color difference between floor and skirting due to the effect of light on a horizontal versus vertical surface and because of the different materials. This color difference is not covered by any warranty.
